

Agrosurf WP85

Specification	Appearance at 25°C	:	Off white powder
	Surface Active Matter % (Equivalent weight 348)	:	78.0 - 87.0
	pH (1% Aqueous)	:	8.0 - 11.0

Typical Properties	Composition	:	Sodium Dodecyl Benzene Sulphonate
	CAS Number	:	68411-30-3
	EPA Status	:	910, 930
	Odour	:	Odourless
	Bulk Density at 20°C	:	0.4 g/cm ³
	Solubility in Water	:	Soluble

Typical properties are based on our own measurements and do not constitute part of the sales specification

Application Agrosurf WP85 offers good wetting in water dispersible granules, wettable powders and for liquid systems that require good quick wetting.

Agrosurf WP85 is an anionic based wetting agent that finds applications in water dispersible granule and wettable powder formulations. Agrosurf WP85 is a solid in its natural form and hence can be easily dry blended into powder based formulations. This product can either be used singularly or in combination with dispersants found within the Agrosurf DIS range.

Agrosurf WP85 is anionic in nature and are compatible with anionic, nonionic and amphoteric surfactants.

Packaging Agrosurf WP85 is supplied in 25kg bags.

Storage Stainless steel, polyethylene or glass lined equipment is necessary for the storage of Agrosurf WP85 in order to prevent corrosion and subsequent contamination. This material can separate on standing and at low temperatures. May require agitation and warming prior to use.

All information, recommendations and suggestions appearing in the literature concerning the use of the product are based upon tests and data believed to be reliable. However it is the users responsibility to determine the suitability for their own use of the products described here. For non English datasheets translation has been carried out using translation software, Lankem accepts no liability due to errors that occur during translation.
